Subjects

Administration
  denture stomatitis, drugs, 219
Adverse effects
  amalgam, mercury, review, 90
Amalgam
  corrosion, 145
  mercury, adverse effects, review, 90
  posterior composites, clinical performance, 101
  smear layer, interaction, 140
Analysis
  bonding, kinetics, 286
  edentate, bone, 85
  electromyography, computers, 297
Anatomy
  restorative dentistry, 36
Assessment
  occlusion, technique, 18
Attitudes
  cross-infection, dental practice, 258

Biocompatibility
  organ culture model, 55
Bond strength
  dentine bonding agents, 233
Bonding
  composite resins, polyalkenoate (glass-ionomer) cement, 188
  composite resins, porcelain, 294
  kinetics, analysis, 286
Bone
  edentate, analysis, 85
Bridgework
  resin-bonded, clinical performance, 114
  resin-bonded, review, 22

Caries
  diagnosis, ultrasound, 201
  tooth loss, restorations, survey, 155
Cements
  complications, 242
  light curing, complications, 182
  zinc oxide–eugenol, cytotoxicity, 66
Clinical performance
  bridgework, resin-bonded, 114
  partial dentures, cobalt–chromium alloys, 135
  posterior composites, amalgam, 101
Clinical trial
  materials, design, 215
Cobalt–chromium alloys
  partial dentures, clinical performance, 135
Complete dentures
  compression trays, dimensional stability, 282
  impression trays, dimensional stability, 227
  patient acceptance, 160
  tooth form, patient satisfaction, 269
Complications
  cements, 242
  cements, light curing, 182
  teeth, transplantation, 80
Composite resins
  polyalkenoate (glass-ionomer) cement, bonding, 188
  porcelain, bonding, 294
  properties, 172, 177
Compression trays
  complete dentures, dimensional stability, 282
Computers
  electromyography, analysis, 297
Consensus conference
  dental implants, 239
Corrosion
  amalgam, 145
Cross-infection
  dental practice, attitudes, 258
Cytotoxicity
  smear layer, dental materials, 222
  zinc oxide–eugenol, cements, 66

Dental implants
  consensus conference, 239
Dental materials
  smear layer, cytotoxicity, 222
Dental practice
  cross-infection, attitudes, 258
Dentifrice
  microbiology, 27
Dentine bonding agents
  bond strength, 233
Denture cleaning
  water temperature, 277
Denture stomatitis
  drugs, administration, 219
Design
  materials, clinical trial, 215
Diagnosis
  caries, ultrasound, 201
Dimensional stability
  complete dentures, compression trays, 282
  complete dentures, impression trays, 227
Drugs
  denture stomatitis, administration, 219
  periodontal, treatment, 247

Edentate
  bone, analysis, 85
Electromyography
  computers, analysis, 297
  muscles of mastication, 71
Enamel
  fluoride, interaction, 166
Endodontics
  pathology, review, 123
  root fillings, technique, leakage, 194
  ultrasound, technique, 120

Fluoride
  enamel, interaction, 166
Function
  mandible, mastication, 210
  partial dentures, precision attachment, 264

Gerontology
  review, 47

Impression trays
  complete dentures, dimensional stability, 227
Inferior dental nerve
  local anaesthesia, technique, 96
Instrumentation
  local anaesthesia, 40

Interaction
amalgam, smear layer, 140
enamel, fluoride, 166

Kinetics
bonding, analysis, 286

Leakage
endodontics, root fillings, technique, 194
posterior composites, 130
Light curing
cements, complications, 182
Local anaesthesia
inferior dental nerve, technique, 96
instrumentation, 40

Mandible
mastication, function, 210
Mastication
mandible, function, 210
Materials
clinical trial, design, 215
review, 1
Mercury
amalgam, adverse effects, review, 90
Microbiology
dentifrice, 27
Muscles of mastication
electromyography, 71

Occlusion
assessment, technique, 18
Organ culture model
biocompatibility, 55

Partial dentures
cobalt–chromium alloys, clinical performance, 135
precision attachment, function, 264
Pathology
endodontics, review, 123
Patient acceptance
complete dentures, 160
Patient satisfaction
complete dentures, tooth form, 269
Periodontal
drugs, treatment, 247
Physiology
saliva, 14
Polyalkenoate (glass–ionomer) cement
composite resins, bonding, 188
setting reaction, 32
Polycarboxylate cements
properties, 76
Porcelain
composite resins, bonding, 294
Posterior composites
amalgam, clinical performance, 101
leakage, 130
Precision attachment
partial dentures, function, 264

Properties
composite resins, 172, 177
polycarboxylate cements, 76

Remineralizing solutions
tooth wear, 147
Resin-bonded
bridgework, clinical performance, 114
bridgework, review, 22
Restorations
tooth loss, caries, survey, 155
Restorative dentistry
anatomy, 36
Review
amalgam, mercury, adverse effects, 90
bridgework, resin-bonded, 22
endodontics, pathology, 123
gerontology, 47
materials, 1
Root fillings
endodontics, technique, leakage, 194

Saliva
physiology, 14
Setting reaction
polyalkenoate (glass–ionomer) cement, 32
Smear layer
amalgam, interaction, 140
dental material, cytotoxicity, 222
Survey
tooth loss, caries, restorations, 155

Technique
endodontics, root fillings, leakage, 194
endodontics, ultrasound, 120
inferior dental nerve, local anaesthesia, 96
occlusion, assessment, 18
Teeth
transplantation, complications, 80
Tooth form
complete dentures, patient satisfaction, 269
Tooth loss
caries, restorations, survey, 155
Tooth wear
remineralizing solutions, 147
Transplantation
teeth, complications, 80
Treatment
periodontal, drugs, 247

Ultrasound
caries, diagnosis, 201
endodontics, technique, 120

Water temperature
denture cleaning, 277

Zinc oxide–eugenol
cytotoxicity, cements, 66
